*The sale proceeds are an important fundraiser for the District and support the local conservation efforts of SWCD.*

*If for any reason the pickup is delayed, you will be notified.*

EVERGREEN TREES	NATIVE DECIDUOUS TREES
<p><b>DOUGLAS FIR</b> (<i>Pseudotsuga menziesii</i>) – One of the most popular choices for Christmas trees and landscaping. A fast growing fir, it's medium, flat, bluish green needles give off a wonderful evergreen aroma. Douglas firs prefer moist, well drained soils. Average height 40 - 80 feet. This fir makes great wildlife cover and works well in windbreaks.</p>	<p><b>BLACK MAPLE</b> (<i>Acer nigrum</i>) - Medium sized to large tree, up to 85 feet tall. Trunk diameter up to 2 1/2 feet; crown broad, with several upright branches. Bark dark brown to black, smooth when young, soon becoming furrowed and scaly. Habitat: Moderately well-drained to somewhat poorly drained bottomland forests; but also thrives on rich upland forest sites. Autumn color yellow.</p>
<p><b>WHITE PINE</b> (<i>Pinus strobus</i>) - A large, picturesque native tree with long soft needles widely used in reforestation, windbreaks. Moderate to fast grower which thrives in a wide range of soils. Average maximum height to 80 feet.</p>	<p><b>WHITE OAK</b> (<i>Quercus alba</i>) - The Illinois State Tree. Known for its majestic beauty and longevity, the White Oak prefers moist, well drained upland soils. This is a sensitive tree which cannot tolerate urban conditions. Acorns are loved by wildlife, produces valuable wood.</p>
<p><b>NORWAY SPRUCE</b> (<i>Picea abies</i>) - One of the fastest growing spruce trees; it can grow to 5 ft. within 5 to 7 years. Grows well in a wide range of soils. Norway spruce is a large, pyramidal tree with long, cylindrical cones that hang like ornaments from the weeping branches against the dark green foliage. This sun-loving, 50 to 80 foot high tree is often used as windbreaks, screens, or hedges in large-scale landscapes.</p>	<p><b>SWAMP WHITE OAK:</b> (<i>Quercus bicolor</i>) –Large tree, up to 100 feet tall; trunk diameter up to 4 feet; crown rounded and broad. Distinguished by leaves which are coarsely round-toothed; softly white and hairy on the undersurface and it's long stemmed acorns. Habitat: Moderately well-drained to poorly drained bottomland forests.</p>
<p><b>COLORADO BLUE SPRUCE</b> (<i>Picea pungens</i>) - Very hardy, pyramidal shaped tree with stiff branches; blue green needles providing excellent nesting, roosting, and winter cover for birds; great in windbreaks. Mature height in Illinois is 30-60' with a spread of 10-20'. Likes ordinary soil, average moisture, full sun. Does not like wet soil.</p>	<p><b>BURR OAK</b> (<i>Quercus macrocarpa</i>) – Large tree, up to 120 feet tall; trunk diameter up to 5 feet; crown rounded with stout branches, trunk straight, stout, sometimes slightly buttressed at the base. Habitat: Prefers rich, well-drained bottomland forests; thrives in upland forests that range in drainage &amp; fertility.</p>
<p><b>WHITE SPRUCE</b> (<i>Picea glauca</i>) - A very hardy evergreen tree that can tolerate heat and drought, and will grow rapidly if planted in a well drained location. With short soft, silver-green needles, it makes a beautiful Christmas tree or ornamental tree and works great in windbreaks. Mature height of 60-70 ft.</p>	<p><b>CHINKAPIN OAK</b> (<i>Quercus muehlenbergii</i>) -Large tree, up to 100 feet tall; trunk diameter up to 4 feet; crown oblong or rounded, with many branches; trunk straight; columnar, buttressed at the base. Acorn borne singly or paired, usually on a short stalk. Habitat: Well-drained to moderately well drained upland forests; prefers alkaline, deep, moist upland sites.</p>
<p><b>AMERICAN ARBORVITAE</b> (<i>Thuja occidentalis</i>) – Pyramidal in habit. Leaves are frond-like on flat branches varying from dark green to light green during the growing season. Grows best in loamy, moist soil. May be planted as an ornamental, hedge or windbreak. It is also a good source for wildlife food, shelter from enemies and elements and nesting cover.</p>	<p><b>SHAGBARK HICKORY</b> (<i>Carya ovata</i>) - Large tree, up to 100 feet tall; trunk diameter up to 3 1/2 feet; crown rounded, with some of the branches often hanging. Distinguished by its shaggy bark, its usually five large leaflets, and its large winter buds. Habitat: Well-drained to moderately well-drained upland forests; occasionally found on terraced bottomland forests with excellent drainage.</p>
<p><b>SHRUBS</b></p>	<p><b>PERSIMMON</b> (<i>Diospyros virginiana</i>) – Medium sized tree, up to 80 feet tall; trunk diameter 2 feet; crown broad and rounded or flattened. Bark dark gray to black, broken at maturity into squarish blocks. Berry; fleshy, spherical, with greenish calyx present at one end, yellow-orange to orange, up to 2 inches in diameter, sweet when ripe, few seeded. Habitat: Moderately well-drained to poorly drained bottomland forests; attains best development on deep, fertile, well-drained alluvial soils; also grows in upland forests that range in fertility and moisture.</p>
<p><b>HIGHBUSH CRANBERRY</b> (<i>Viburnum trilobum</i>) – Broadleaf Shrub; yellow to red purple fall color. New foliage has reddish color. Bears extremely handsome whiter flowers and bright red fruit.</p>	<p><b>QUAKING ASPEN</b> (<i>Populus tremuloides</i>) – medium sized tree up to 60 feet tall; trunk diameter up to 1 1/2 feet; crown rounded or occasionally spreading. The whitish trunk and the ovate, trembling leaves distinguish this species. Habitat: Favorable to a wide variety of forested sites; pioneer species after disturbance.</p>
<p><b>REDOsier DOGWOOD</b> (<i>Cornus stolonifera</i>) – Native shrub, very distinctive red branches highly recommended for windbreaks. Produces small, flat clusters of whitish flowers in late May followed by white berries that are a favorite food of song birds. Adapted for wet soils but will also do well upland when established.</p>	<p><b>BLACK WALNUT</b> (<i>Juglans nigra</i>) - Large tree, up to 120 feet tall; trunk diameter up to 5 feet; crown broadly rounded; trunk straight, columnar, not buttressed at the base. Nut borne singly or in pairs, spherical up to 2 inches in diameter. Habitat: Moderately well drained to somewhat poorly drained bottomland forests; attains it's best development on deep, fertile, well-drained alluvial soils; also thrives in rich, well-drained upland forests. Illinois most valuable hardwood species</p>
